

PERSONAL OS · HI-FI V5 · PAISA + DIET

Agent hi app hai.

v5: Diet circle ab live hai

D par tap karo — wahi UI, wahi pattern: ring = protein (48/135g), top bar = calories, dropdown se 7 din/mahine ka trend (9 din data, 4–12 Aug). "+ Aur" se carbs/fat/fibre/sleep. Paani, hilna-dulna, "bacha" text — kuch nahi rakha.

Plan agent bolta hai

Diet mein greeting hi meal plan hai — 3 breakfast chips, tap = log + protein turant update. @history se meal table. Har mode ki apni conversation yaad rehti hai.

Diet data placeholder hai

Healthy_Eating_Tracker.xlsx abhi upload nahi hua — wireframe ke 9-din numbers use kiye. Excel bhejo to asli daal dunga.

Aage kya

Bolo to: protein trend sparkline, Recipes tool (@recipes — sirf jo ghar par hai), ya Work module.
